

## Technical Updates

### **Error Concerning Torque Wrench Specifications**

It has come to our attention that there is miss-print in our 2008 catalog, included torque wrench directions and in some distributor catalogs concerning our 2008 Torque wrench.

Our literature mistakenly lists the torque specifications as ranging from 20 – 250 inch-lbs (2.5 – 28 Newton – Meters).

**Our literature should read: The Pedro's Pro Torque Wrench will apply 53-266 inch-pounds or 61-306 kg-cm or 6–30 Newton-Meters.**

We sincerely apologize for any confusion or inconvenience.
